Mongo DB

INTERNSHIP

Vitra.ai

Software Developer Intern

February 2021 - Ongoing Bangalore

<https://www.vitra.ai>

I am working as a part of the Tech Team to develop different products using React JS, Next JS Node JS, Express JS, Nest JS & API provided by them. I have worked in both frontend and backend of different management system projects within a team.

PROJECTS

DFA Minimization Simulator

<https://automata-app.vercel.app>

This is a Deterministic Finite Automata(DFA) Minimization Simulator Developed in React Js & Express Js. This DFA Minimization Process Use Partition Algorithm.

Bank Search App (Your-Bank-IFSC)

<https://yourbankifsc.com>

A fully-featured bank searching application with location or IFSC code or MICR code or with any information about the bank developed in PHP, MySQL, and Bootstrap. Here I have developed one feature like Search Engine where users can search any bank by any details about the bank.

Y3Mate

<https://y3mate.vercel.app>

This is a youtube video & audio downloading application developed using React JS, Node JS & Express JS. This application is fully responsive and user-friendly. This application is developed by scrapping data from <https://www.y2mate.com> & used technologies like js-dom.

Open Chat App

<https://open-chat-webapp.vercel.app>

This is a chat application where you don't need to register using your personal information. Initially when you click on signup, system provides one public and private id. Using private id you can login & you can share public id to your friends to start chatting. You can chat with anyone if you know public id of that user. This application is developed using React JS, Node JS, Express JS & Mongo DB. This application is fully responsive and user-friendly.
